DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10, 11, 15, 16, and 20-24 rejected under 35 U.S.C. 103(a) as being unpatentable over Weiss US Patent 6,071,190 in view of Microsoft Press Computer Dictionary 3rd Edition and Newtons Telecom Dictionary. The rejections contained in the previous office actions are relevant and incorporated herein. Weiss discloses all of the instant application as previously specified in the previous rejections. The newly added references are added because of the applicant's demand for the examiner to provide a reference for what the examiner considered hornbook engineering and official notice. The bus Standards and expansion slots claimed are all highlighted in the newly added references.

Response to Arguments

2. Applicant's arguments filed 3/5/03 have been fully considered but they are not persuasive.

With respect to the applicants arguments that the examiner does not provide an objective reason for the drastic modification of Weiss. The examiner is unsure what dramatic modification of Weiss the applicant's representative is referring to. It seems

Art Unit: 3713

that the claims are directed to each and every different method of placing additional memory on a buss on a motherboard in a computer backplane and the examiner contends that these methods are notoriously well known as can be seen from a detailed reading of the highlighted pages of the references used in the invention.

Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

With respect to the applicant's belief that an expansion slot on a motherboard is a patently distinct limitation please see the above presented reference with respect to motherboards, expansion slots and specifically expansion on page 183 where it states that a way of increasing a computer's capabilities by adding hardware that performs tasks that are not part of the basic system. Expansion is usually achieved by plugging printed circuit boards into openings called expansion slots inside the computer. Whether the expansion is done by a buss or a slot on the motherboard both systems are still connected and therefore analogous. See also the picture of a board on page 184 that holds 8 bit and 16 bit expansion slots on a motherboard.

Art Unit: 3713

The examiner does not understand what elimination or consolidation of components the applicant's representative is referencing.

Conclusion

3. Applicant's request for the examiner to provide reference to what the examiner considered hornbook engineering and took official notice to prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
